To develop sports leaders to assist at break and play times	£0	To have sports leaders engaging KS1 and lower KS2 pupils in activities

St Johns School has created an action plan for the sports funding that will be sustainable and create a legacy that will last after the funding has stopped. We have created a vision which we hope will inspire the pupils to be active, happy and lead healthy lifestyles into the future. This may include increased participation in competitive sports or clubs, opportunities to keep active through leisure or recreational activities and a better understanding of how to live a healthier lifestyle.

Firstly, along with ten other primary schools, we have spent some of our funding joining the Primary Sports Alliance facilitated by Camborne Science and International Academy. Over the next 2 years, we have dedicated 50% of our budget to become part of the Camborne Science and International Academy Primary Sports Alliance but over a 3 year period. The CSIA Primary Sports Alliance has been formed, establishing a collaborative approach to develop and sustain high quality PE and Sport provision now and for the future. We aim to work together on a number of areas to enhance the quality and quantity of PE and Sport available to our students.

The initial focus of the Alliance is to provide opportunities for more students to participate and compete in physical activity, ultimately promoting healthy lifestyle habits and a life-long passion for sport. Another main focus for the Alliance is improving the quality of Physical Education lessons taught within school time through professional development and training for all teachers. This is being achieved through the delivery of a range of courses focusing on all areas of the curriculum to improve

teachers' confidence and competence to deliver fun, engaging PE lessons that promote physical literacy and learning. This year we have had the support of Matt Kane, who has worked with children and teachers in all classes to help the delivery of high quality PE lessons.

The Alliance has seen a number of successes already this year, with all members embracing the opportunity to work with each other to develop their provision. As an Alliance they all recognise the impact PE and Sport can have on all areas of school life, and are committed to improving the experience of all students in their schools. The benefits that this will have on students will be seen both immediately in the schools, and in years to come when they have adopted a healthy, active lifestyle and a passion for physical activity and sport. St. Johns School will use the remainder of the funding to support us:

- Further develop staff's ability to deliver high quality PE lessons through CPD
- Increase the amount of physical activity available to pupils within the curriculum
- Teach pupils the importance of healthy lifestyles
- Assess curriculum development of pupils using new formats
 - Improve sports equipment and recreational areas in school
 - Provide additional school clubs and opportunities for pupils
 - Provide outdoor experiences and adventurous activities across the school
- Increase participation levels within sports or leisure activities for targeted pupils
 - Communicate our vision and provision with the community
